The MAILING DATE of this communication app ars on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1, 2, 10-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Johnson et al.

With regard to claims 1 and 2, Johnson et al (US 6,375,479) disclose a personal computer card (14) comprising:

an extensible antenna (Abstract, lines 12-14);

a coil spring (92); and

a track (col. 11, lines 58-62) laterally displaced with respect to the coil spring.

a catch (102) that retains the antenna (part of 24) in the retracted position, the catch (a resiliently biased follower) being spring biasing (col. 12, lines 37-41).

With regard to claim 10, Johnson et al disclose (Fig. 10) the traveler (24) that mounts said antenna.

With regard to claims 11-13, Johnson et al disclose the structural features of the computer card which is operated according to method steps claimed.

With regard to claims 14 and 15, Johnson et al disclose that the antenna moves approximately 27 mm (col. 7, lines 35-39 and Fig.. 2-3).

With regard to claims 16 and 17, Johnson et al disclose a traveler (24) comprising:

an antenna (Abstract, lines 12-14);

a coil spring (92);

Application/Control Number: 10/039,015

Art Unit: 2833

a track engaging element (98, 90) having U-shaped portion, a track engaging element which is a cantilevered leaf spring (102).

## Response to Arguments

Applicant's arguments filed 09/03/2002 have been fully considered but they are not persuasive.

Applicant argues that the prior art (Johnson et al) does not disclose a catch being spring biased. As it was stated in this office action, the catch is spring biased.

As for requirement of the amended claim 16, that the track engaging element being a cantilevered leaf spring, Examiner respectfully submits the following. To prevent any jam in a case of a small inclination of the traveler (24) from a linear movement, the catch (102) of Johnson et al should be inherently spring biased. Also, the configuration (Fig. 9) of the catch presented (a cantilevered flexible element) meets the requirement of the catch being spring biased.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Gilman whose telephone number is (703) 305-0847. The examiner can normally be reached on Monday-Friday, 10:30 a.m. - 8:00 p.m.

Application/Control Number: 10/039,015

Art Unit: 2833
